NEW CERT TEAM CLASS • February 2012
Class 1 – Feb. 4, 2012 – CERT team members had orientation class and then split into three teams. We then went to Oracle State Park for a planning exercise making observations that will be used the following Saturday in the classroom.
Class 2 - February 11, 2012 - CERT class 2 spent much of the day learning about basic first aid, mass causality triage and the role of CERTs in a disaster. In the picture below, firefighters are showing a group of eight new CERT students how to secure a patient to a backboard. The same patient (one of our Fire Explorers) also volunteered to have one of his arms splinted and the other arm heavily bandaged to control bleeding.

class 3 - February 18, 2012 Utility shutoff and safety during evacuations was one of the topics.

continued . . .
How to ready a victim for transport. Thanks Jordan for being the ‘victim.’
