ORACLE'S EMERGENCY NOTIFICATION SYSTEM

Through dollars collected at the Oracle Brush Dump, the Oracle Firewise Board has implemented the ENS (Emergency Notification System), for Oracle Fire District.

In the event of a wildfire or another unforeseen catastrophe, Oracle Fire District is able to send a telephonic message to your home or cell phone alerting you to the danger and the need to possibly evacuate. Oracle is divided into 19 sections, so depending on where the fire or other emergency is located, it may not be necessary to evacuate the whole community. This can be done through the **Emergency Notification System**.

See Section map at *www.oraclefire.org*

Periodically, a test is done by the system to ensure it is working properly. Usually, just answering the phone or allowing it to go to voice mail will confirm this.

There is no cost to the homeowner or property owner to be included in the ENS system. The information is not shared with anyone or sold. It remains confidential with Oracle Fire District. To ensure you are included in the system and will receive those alerts, please complete the attached form and return to:

Oracle Fire District Office
